Claims 1-3, 15-23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for alkyl groups as hydrophobic substituents, does not reasonably provide enablement for any hydrophobic substituent. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. On page 11 et seq applicants disclose how to add alkyl groups. However, nowhere in the specification do applicants disclose how to add other hydrophobic groups such as a silyl group.

Claims 1-3, 15-23 are rejected.

Claims 4-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
